WELCOME TO PRODYNA ACADEMY

DEVELOPING BUSINESS APPLICATIONS AND TOOLS ON MICROSOFT CLOUD PLATFORM

We are an international IT service and technology consultancy organization. Our focus is on innovative and customized IT solutions. We offer you the opportunity to grow with us, a dynamic and experienced team. We are opening PRODYNA School, series of lectures in 4 weeks' time, followed by the final assignment.

Thanks to the variety offered on the platform, you will research and learn all currently modern technologies for the development and integration of IT solutions. During the introduction and work on the platform, together we will establish the direction of your further development according to your interests and skills (platform administration, low-code development, back-end or front-end development, etc.).

PRODYNA invites you to join us on this journey that will open a world of new possibilities on the Microsoft platform. On the next page, you will find the topics and technologies you will encounter and work on.

Azure platform

- Administration and maintenance
- Knowledge and use of Azure services (AI, Storage, Functions, Automation, Logic Apps, Azure hosted apps)
- Azure application development
- Azure DevOps
